

Military Asset Management System

Project Overview

A full-stack web application to manage military assets such as vehicles, weapons, and ammunition across multiple bases. Supports secure asset tracking, purchases, transfers, assignments, and role-based access control.

Live Demo

Frontend: <https://military-asset-management-swart.vercel.app>

Backend: <https://military-backend-olq6.onrender.com>

Login Credentials

Admin: admin@gmail.com / 123456

Commander: commander@gmail.com / 123456

Logistics: logistics@gmail.com / 123456

Features

JWT authentication, protected routes, bcrypt password hashing, purchases, transfers, assignments, dashboard, admin user management, responsive UI.

RBAC

Admin = Full Access

Commander = Dashboard + Assignments

Logistics = Dashboard + Purchases + Transfers

Tech Stack

Frontend: React.js, Tailwind CSS, Axios

Backend: Node.js, Express.js, JWT, bcryptjs

Database: MongoDB Atlas

Deployment: Vercel + Render

API Endpoints

POST /api/auth/register

POST /api/auth/login

GET /api/auth/users

GET /api/assets

POST /api/purchases

POST /api/transfers

POST /api/assignments

Local Setup

Clone repo, install dependencies in backend and frontend, create .env with MONGO_URI, JWT_SECRET, PORT=5000.

Future Improvements

Audit logs, reports export, analytics dashboard, email alerts, edit/delete users, advanced filters.
